TRADITIONAL INK

Traditional ink is Gentian Violet ink and has been used in the industry to mark patients for over 40 years. It can withstand betadine and iodine scrubs. AllSkin[®] (pg 10) features a brilliant blue option available for visibility on all skin tones.

Ideal for procedures above the neck or where betadine and iodine are used.

Featured on pages 8-13

GV FREE INK

Viscot Medical's GV Free ink is a gentian violet free alternative to Viscot's Traditional ink. Eliminates concerns over Gentian Violet while maintaining the classic purple color.

Ideal for procedures above the neck or where betadine and iodine are used.

Featured on page 14

XL PREP RESISTANT INK

Viscot XL Prep Resistant Ink is visible up to 10x longer vs. traditional gentian violet ink. Able to withstand a 60 second prep of Chloraprep, XL Ink remains visible against all common alcohol based prep solutions. Available in gentian violet free red and green ink for enhanced visibility on all skin tones.

Ideal for any procedure where aggressive preps are used.

Featured on pages 16-18

EZ REMOVABLE INK™

Viscot Medical's EZ Removeable Ink is designed to come off easily with an alcohol swab or even warm soap and water. Available in red, green, and white.

Ideal for non-surgical aesthetic procedures.

Featured on page 20

WATERPROOF UTILITY INK

Black Utility ink is designed for writing on medication labels. Smudge-proof, waterproof, and fluid resistant.

Ideal for writing on labels, glass, vinyl and other surfaces.

Featured on page 26-27

ULTRA FINE TIPS

Viscot Medical's soft rounded Ultra Fine tips create fine lines while eliminating concerns over causing trauma to delicate tissues and reducing frustration from sharp marker points snagging making it difficult to draw.

Ideal for facial procedures such as blepharoplasty procedures.

REGULAR TIPS

This is the most common tip style found on the market. Designed to provide versatility and a middle-ground between fine lines and thick lines.

Ideal for most general procedures and for correct site marking.

BOLD TIPS

Viscot Medical's bold tips cover a wide surface area and create broad lines. Additional tipsurface makes it more difficult for the marker to clog and appear dry.

Ideal for abdominoplasty procedures and vascular procedures.

BROAD TIPS

Viscot Medical's broad tip is unique to our 1404 and 1405 markers. This tip was specifically designed to replace gentian violet ink stamp pads. The paintbrush like tip coats instruments easily and completely.

Ideal for coating surgical instruments with ink but especially cataract procedures.

MINI MARKERS

Viscot Medical's Mini Markers are economical and eco-friendly. They're about half the size of a standard marker so they're about half the cost and produce half the waste.

Perfect for promoting single patient use.

PRECISION BARREL

Our standard barrels designed with a comfortable grip in mind. Precision Barrels feel and perform like a fountain pen. Featured on our Precision Markers and full size XL markers.

WIDE BARREL

Thicker barrels that feel more like a standard marker and less like a pen. All Wide Barrel Markers have a clip cap.

VALUE BARREL

This barrel feels like a pencil when gripped. Value barrels are thinner and shorter than Precision and Wide barrels, but not as small as a Mini Marker. Less plastic means more cost savings.

MULTI-TIP BARRELS

Features two tips one on each end. Multi-Tip barrels differ depending on the exact product numbers but are an economical, convenient and eco-friendly alternative by providing two markers in one.

Usually featuring different tips, the unique Blephmarker[®] (pg 9) features two ultra fine tips, offering a fresh tip per eyelid.

PRESSURIZED BARREL *

Found in Viscot Medical's Visflow Markers. Designed to keep marking even through fluids on wet tissue.

Ideal for abdominoplasty procedures, breast procedures, and liposuction.

*patent pending

TRADITIONAL INK SURGICAL MARKERS

Pre-Op & Intraoperative Markers Filled
with Gentian Violet Ink or GVFree alternatives.
Ideal for procedures where Betadine or
Iodine are used.

MALE URINAL

PART #	DESCRIPTION	CASE QTY
221000	Male Urinal	50 35.

Rulers & labels included in sterile packaging:

Viscot Medical Sterile markers come individually packaged often with a fluid resistant ruler and sometimes with back up labels. Rulers are flexible fluid resistant coated paper and include both metric and U.S. measurements units (15 cm / 6 in).

Blank back up labels included with markers come in quantities of 4 or 9. They are paper based labels and are designed as a back up to our standard pre-printed medication labels.
