

BD™ Blunt Fill and Blunt Filter Needles

BD® Blunt Fill and Blunt Filter needles are specifically designed to reduce the risk for needlestick injuries during medication preparation.

- Fill needle with blunt tip
- The BD Blunt Filter Needle has a 5 micron filter to filter out particles such as glass and plastic fragments, for safer medication delivery
- Sterile, single use
- Natural Rubber Latex is not part of the material formulation

BD Nokor™ Admix Needles

The BD Nokor™ needle has a cannula side port to place fluid on the sidewall of a container during reconstitution that helps reduce foaming or spray of powdered medication.

- Some drug manufacturers recommend this to help reduce foaming or spray of powdered medication
- Sterile, single use

BD Nokor™ Admix Needles
